w username: A kiválasztott fiók pár adatát mutatja meg

w xyz:

The screenshot shows a Linux Mint desktop environment. A terminal window is open, displaying the output of the command `w xyz`. The output shows the system is up for 25 minutes, with 1 user logged in. The terminal also shows the output of the `ps` command, which lists the processes running on the system. The desktop background is a dark, textured image. The taskbar at the bottom shows various application icons, including the Dash, Home, and Install Linux Mint buttons. A video call window is visible in the top right corner, showing a person's face.

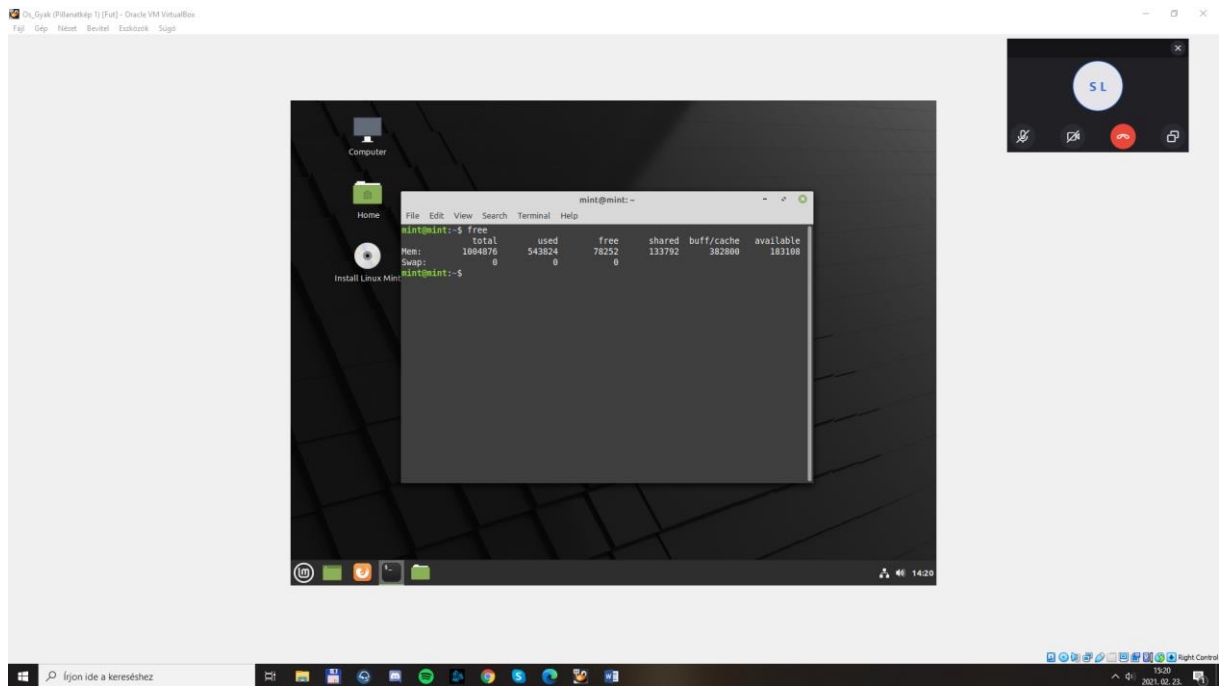

```
mint@mint:~$ w xyz
14:15:18 up 25 min,  1 user,  load average: 0.00, 0.01, 0.06
USER      TTY      FROM             LOGIN@   IDLE   XCPU   PCPU   WHAT
mint@mint:~$
```

ps -auxf | sort -nr -k 3 | head -5 - 5

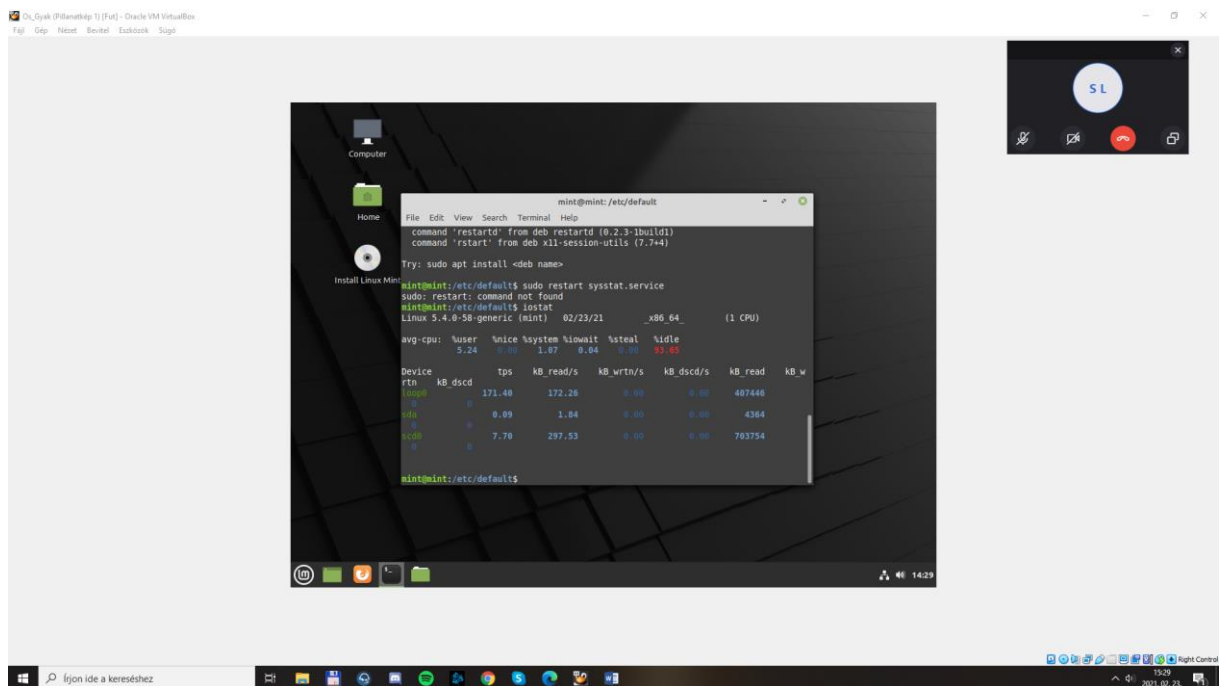

The screenshot shows the same Linux Mint desktop environment. The terminal window now displays the output of the command `ps -auxf | sort -nr -k 3 | head -5 - 5`. The output shows the top 5 processes by memory usage, sorted in descending order. The desktop background, taskbar, and video call window remain the same.

```
mint@mint:~$ ps -auxf
USER      PID TTY          TIME CMD
mint      2289 pts/0    00:00 bash
mint      2285 pts/0    00:00 ps
mint@mint:~$ ps -auxf | sort -nr -k 3 | head -5 - 5
